General Note

The following symbols and conventions are used throughout this bulletin:

- (1) n.a : not available
- (2) - - : nil or less than half the final digit shown
- (3) . . . : not comparable or not fixed
- (4) (d) : discontinuity in the series; this sign will usually be accompanied by an explanatory note in the back section of the bulletin.
- (5) (P) : provisional data

Users should also note that:

We have made some changes in presentation and in the definitions of the data on the banking system. These changes are designed to provide users with more detailed information and more comprehensive definitions for analysis and policy making.

We have added new tables, and some additional columns to existing tables, to provide users with disaggregated information in the format used by our economists. This should help users to understand the terms and concepts used in the Research Department's analysis of the banking system.

Work continues on improving our definitions and presentation.

Tables affected are: Section B: Tables 3 and 4.
Section C: Table 2.
Section H: Table 1.

- (a) Owing to rounding of figures, the sum of separate items will sometimes differ in the final digit from the total shown.
- (b) Data in the tables are subject to revision from time to time as more current information becomes available.
- (c) Tables B1-B23. As of April 1, 1978, the Barbados Savings Bank assumed commercial banking functions and was incorporated into the Barbados National Bank as its Commercial Division. Its accounts are consolidated with commercial banks as from the end of April.
Table B21. This table has been adjusted to include the foreign reserve requirement of the commercial banks.

Tables D1-D2. The Barbados National Bank, Trust Division was established in October 1980. Its accounts are consolidated with trust companies as from the end of May 1981.

New tables D3, D4 and D5 have been included while D6, D7 and D8 (Barbados Development Bank tables) have been replaced with the National Insurance tables.
- (d) Tables B2, B5, B6, B12, C2, G9, H1. Following the closure of the local branch of the Bank of Chicago their loans to Government totalling \$10.9 million, which were funded from external sources, have been transferred to an overseas branch. As a result, commercial banks' foreign liabilities and domestic credit to Government decreased, while Government's foreign debt increased by a similar magnitude.
- (e) The Index of Industrial Production tables with base 1971=100 have been discontinued and the new Index 1994=100 has been included.

Notes to the Tables

Section A

Monetary Authorities

Table 1: Net International Reserves and Net Domestic Assets

This table is a consolidated summary of the assets and liabilities of the Central Bank and Central Government.

Monetary Base

Commercial Banks Reserve Position -Defined as deposits at the Central Bank plus cash in till at Commercial Banks.

Currency with the Public -Total currency liability of the Central Bank less cash held at Commercial Banks and the Treasury. A break down of this item is given in the table "Money Supply".

Monetary Base - is the sum of the Commercial Banks reserve position plus currency with the public.

NIR of Monetary Authorities

Central Bank Foreign Assets (Net) & Other Securities -is the total external assets of the Central Bank less short term foreign currency borrowing plus foreign securities of the ICF and Staff Pension Scheme which are managed by the Central Bank.

Government Foreign Assets - includes foreign assets of the General Accountant, sinking funds for domestic debt and statutory sinking funds for foreign debt. (See Notes to table H1).

Monetary Authorities Foreign Assets - is the sum of Central Bank foreign assets (net) plus Government foreign assets.

IMF Credit - is the total borrowing from the International Monetary Fund for balance of payment purposes.

Net International Reserves (NIR) - is the sum of the Monetary Authorities foreign assets minus credit from the International Monetary Fund.

Net Domestic Assets

Net Claims on the Public Sector - is the sum of Central Bank's holdings of Government treasury bills and debentures plus loans to Central Government less Government deposits at the Central Bank and deposits of the National Insurance and other Non Financial Statutory Bodies.

Credit to Commercial Banks - is the total short term borrowing by banks plus borrowing under special discount schemes.

Credit to the rest of the Financial Sector - includes loans and advances plus holdings of securities and equity in public financial institutions.

Net Domestic Assets - is defined as:

- (1) Net claims on the Public Sector plus credit to Commercial Banks and the rest of the financial sector plus other unclassified items.
- (2) The Monetary Base minus the NIR of the Monetary Authorities.

Table 2: Central Bank of Barbados - Assets
Foreign Currencies and Balances

Foreign notes and coins; balances with the Bank of England, the Crown Agents, the Federal Reserve Bank of New York and other foreign institutions; regional clearing accounts.

Money Market Securities

Treasury bills and other securities of the U.K., U.S., Canada and other foreign governments and international organisations. The increase in December 1974 results from the takeover by the Central Bank of foreign assets previously held by Government and statutory bodies.

Advances to Banks

Includes Sugar Industry Agricultural Bank up to March 31, 1978, and thereafter the Barbados National Bank Agricultural Division.

Other Assets

Includes expenditure account, fixed assets and domestic clearing account.

Reserve Tranche

The Reserve Tranche (Gold Tranche prior to second amendment of the IMF Articles of April, 1976) is that part of Barbados' quota in the Fund which must be paid up in SDRs, US\$ or any other currency except in Barbados dollars. Fluctuations may occur as a result of exchange movements or if Barbados draws on its Reserve Tranche.

Holdings of SDRs

From time to time the IMF allocates SDRs to its members in proportion to their quotas. Members are free to convert these SDRs into US\$ or any other foreign currency or they may hold them as part of their reserves.

Table 3: Central Bank of Barbados - Liabilities

Special Government Deposits

Includes (1) up to December 1981 deposits created in favour of Government funds whose foreign assets were sold to the Central Bank in December 1974; these deposits may only be drawn upon after prior agreement between the Government and the Bank. (2) The contra-entry of the Reserve Tranche on the assets side of the Bank's balance sheet. (3) The proceeds of Government foreign borrowing deposited with the Central Bank. (4) Project Funds,

Banks' Deposits

Deposits of Commercial Banks and the Barbados Savings Bank.

Other Deposits

Deposits of public enterprises and financial institutions (except the Barbados Savings Bank) and of regional and international organisations.

Foreign Deposits

As of April 2006, foreign deposits of commercial banks has been included in the Deposits of Banks.

Table 4: Central Bank of Barbados - Foreign Assets by Currency

C.M.C.F:

The CARICOM Multilateral Clearing Facility (C.M.C.F.) came into effect on June 16, 1977. This Facility superseded the bilateral clearing arrangements which were in effect prior to June 16, 1977, and was established with the following aims and objectives:

- (a) to facilitate settlement on a multilateral basis of payments for eligible transactions among the participating countries;
- (b) to promote the use of participants' currencies in settling eligible transactions between their respective countries and thereby effect economies in the use of their foreign exchange reserves; and
- (c) to promote monetary co-operation among the participants and closer relations among the banking systems in their respective countries and thereby contribute to the expansion of trade and economic activity In the CARICOM region.

This facility was suspended on the March 31, 1983 when it reached its credit limit of US\$100 million.

Balance in Euro commenced January 1, 1999, while those in the Deutsche Mark were discontinued.

Section B

Commercial Banks

Table 1: Commercial Banks - Assets

Cash

With effect from December 1973, foreign cash balances are excluded.

Loans and Investments - Government - Other

A breakdown of investments is available only *from* September 1970. However, prior to this, investments were comprised mainly of treasury bills.

From January 2003 loans and investments show large changes from previous period due to reclassification of some accounts.

Loans and Advances

Also includes commercial bills discounted payable in Barbados and loans and advances made to non-residents.

Foreign Assets

Balances due from banks and financial institutions abroad, foreign cash, foreign investments, foreign commercial bills and foreign interest receivable.

Other Assets

Includes fixed assets and debit balances on profit and loss account

Table 2: Commercial Banks - Liabilities

Deposits

Excludes inter-bank deposits, but include Government deposits, foreign currency deposits and non-resident deposits.

Foreign Liabilities

Balances due to banks and financial institutions abroad.

Other Liabilities

Includes capital, reserves, undistributed profits, deferred interest charges and cheques and other intransit items.

Table 3: Commercial Banks - Foreign Assets

Short Term Liabilities

See notes to table B4

Commercial Banks Net Foreign Assets

The sum of foreign assets less short term liabilities.

Net Foreign Assets

Net Foreign Assets have declined due to the reclassification as indicated on Table B4.

Table 4: Commercial Banks - Foreign liabilities

Medium Term Liabilities

Foreign borrowing with maturities over one year.

Short Term Liabilities

The sum of foreign liabilities plus foreign currency deposits of non-residents minus medium term liabilities.

Foreign Currency Deposits

Foreign Currency Deposits of Non-resident were adjusted upwards to reflect a reclassification.

Table 5: Commercial Banks - Credit-Sectoral Distribution

This table consists of two parts; data for eight of the categories into which bank credit is divided is contained in Part 1; data for the remaining seven categories (and the total of all loans) appears in Part 2.

The forms on which banks report loans and advances were revised with effect from June 1969 to provide more detailed information. There was a second revision in December 1973 and subsequent data are not strictly comparable in some categories. The present classification is based on the UN International Standard Industrial Classification.

Loans to Government

Prior to December 1973, includes loans to statutory bodies.

Total Loans

The change in loans at October 1993 and February 1995 reflects the exchange of debentures for Government Guarantee

Figures have been revised from 1999.

From January 2003 loans to financial institutions declined. See note on Table B1

Table 6: Commercial Banks: Credit to Agriculture

Figures have been revised from 1999.

Table 7: Commercial Banks: Credit to Manufacturing

Figures have been revised from 1999.

Table 8: Commercial Banks : Mortgage Loans

Mortgage loans made for the construction or acquisition of houses, buildings, lands, etc. where the mortgage is secured by a lien on that same property.

From May 1, 1976, the Central Bank has, from time to time, fixed interest rates on mortgage loans. These rates are shown in the table below. As from July 1, 1985 the interest rate chargeable on all commercial mortgages was no longer fixed by the Central Bank.

With effect from September 15, 1992, the Central Bank ceased to fix the maximum interest rate chargeable on residential mortgages.

From April 1999, mortgage loans increased due to the transfer of a Trust Company's mortgage loan portfolio to its commercial division.

The notation (..) Indicates that no interest rate ceiling or floor was in effect for the category shown in the column heading.

Effective July 2006, the new variable Average Mortgage Rates was added to this table. The rates prior to 2000 are those set by Central Bank up to 1991 and which prevailed thereafter.

Table 11: Commercial Banks - Consumer Instalment Credit - Summary

Instalment credit is defined as personal loans repaid on a regular instalment basis.

Past-Due Accounts

As of January 1974, the figure includes all debt three months or more past-due.

The data from January 1998 has been revised. Further, a category of loans previously included has been excluded (due to reclassification) from January 1999. Consequently, Debt Outstanding at January 1999 shows a large change from December 1998. There exists a discrepancy between November and December of 2003, due to an adjustment made by a commercial bank.

Table 12: Commercial Banks: Consumer Instalment Credit

The data from January 1998 has been revised. See note on Table B11.

Table 13: Commercial Banks: Consumer Instalment Credit

The data from January 1998 has been revised. See note on Table B11.

Table 21: Reserve Requirements and Stipulated Government Securities of Commercial Banks

Required Reserves

Reserves are shown for the week preceding the last Wednesday of the month. Up until November 1981, banks computed the required percentage on deposits outstanding at the close of business on Wednesday

of each week. Effective November 25, 1981, the Central Bank directed banks to compute this requirement on the basis of a three week average of deposits for the three weeks prior to the reporting date.

Average Cash Reserves Held - Total

Domestic

Up until the end of August 1974, only balances held with the Central Bank were eligible for complying with this requirement. On September 5, 1974, the banks were allowed to include till cash as an eligible reserve asset.

Foreign

From April 01, 2006, banks were required to hold 6% of their foreign currency deposits with the Central Bank.

See table for changes in cash reserve requirement.

Stipulated Government Securities

Up until October 1981, banks computed the amount of Government securities needed to satisfy Central Bank stipulation on the basis of total deposits outstanding at the end of the month. From November 1981 banks were allowed to exclude foreign currency deposits from their total deposit liabilities.

From December 1973 until August 1974, stipulated Government securities held by Commercial Banks consisted of treasury bills only. From September 1974, banks were allowed to consider their debentures towards making up any deficiency in their treasury bills requirements.

From March 24, 1975, banks were required to hold a stipulated portion of their deposits in debentures.

From August 1975, the Central Bank agreed to treat holdings of bonds issued by statutory bodies as part of debenture holdings. From November 1982, sugar bonds were also eligible holdings.

From February 01, 2001, the Bank removed the stipulation, which required commercial banks to hold a specified amount of their deposits in debentures.

See Table for changes in stipulated government securities.

East Caribbean Currency Authority notes and British Caribbean Currency Board (B.C.C.B.) coins were the circulation currency until December 1973, when the Central Bank began its first note issue.

Notes and Coins in Circulation

Adjustment has been made to take account of East Caribbean Currency Authority notes and B.C.C.B. coins still in circulation between December 1973 and February 1974 (for notes) and February 1974 to June 1975 (for coins), and also to exclude in April 1974, a small currency float in the currency division of the Central Bank.

Treasury and Bank Cash

Prior to 1972, includes Commercial Bank cash only; subsequently includes cash held by the Treasury and by the Barbados Savings Bank as well.

Demand Deposits Adj.

As of December 1973, the following adjustments are made to the total which appears in the table Commercial Banks Liabilities:- Government deposits, deposits of the Barbados Savings Bank and cheques in the course of collection from Commercial Banks are deducted, and managers' cheques, certified cheques, drafts and transfers are added.

Table 2: Monetary Survey

This table is compiled from the statement of assets and liabilities of the Central Bank, Commercial Banks, the Barbados Savings Bank and Central Government.

Banking System Net Foreign Assets

Foreign assets held by the banking system and Central Government, less short term foreign liabilities of the banking system. This corresponds to the item "Banking System NFA" as shown in the table International Reserves.

The Banking System NFA was revised from 1990 due to changes in Commercial Banks' NFA (see Tables B3 and B4).

Effective July 2004, Net Foreign Assets was adjusted downwards to reflect reclassification as indicated on Table H1 & B4.

Domestic Credit - Public Sector***Central Government Net***

Total holdings of treasury bills, debentures and other claims on Central Government by the banking system, less Government deposits maintained with the banking system. Foreign assets held by Government (including sinking funds held for domestic debt) are treated as foreign assets of the monetary authority, matched by a corresponding deposit in favour of Government. Foreign assets held by Government are therefore de-deducted from net credit to Government.

Non Financial

Holdings of securities plus loans and advances to statutory corporations.

Financial

Holdings of securities plus loans and advances to public financial enterprises.

Domestic Credit - Private Sector - Non Financial and Financial

Central Bank and Commercial Banks local investment plus loans and advance to the private sector, (Inter-bank borrowing not included).

Money Supply

The composition of this item is given in the table Money Supply.

Quasi-Money

Demand Deposits: are adjusted as for the Money Supply.

Time Deposits: Commercial Banks time deposits plus time deposits at Barbados Savings Bank, less time deposits of Government and Barbados Savings Bank held at Commercial Banks.

Saving Deposits: Commercial Bank saving deposits plus savings deposits at Barbados Saving Bank, less savings deposits of Government.

Total Monetary Liabilities

The sum of Money Supply plus Quasi-Money minus Foreign Currency Accounts of Non-Residents.

Table 3: Monetary Liabilities

This table gives a breakdown of Monetary Liabilities by sector. The total should correspond to the total of Monetary Liabilities in Table C2.

Foreign Currency Deposits - Residents

From 1990, foreign currency deposits of residents were revised to reflect the correct classification of deposits between residents and non-residents.

Effective July 2004, Foreign currency of residents was adjusted downwards to reflect a reclassification.

Table 4: Consolidated Statement of the Financial Sector - Assets

This table is a consolidated statement of the assets of financial institutions in Barbados. This group includes the Central Bank of Barbados, Commercial Banks, Trust Companies, the Barbados Savings Bank, the Development Board, the Sugar Industry Agricultural Bank Barbados National Bank - Agricultural Division and the Barbados Mortgage Finance Corporation.

Memo Items

These figures represent differences between total assets and total liabilities, for years when assets exceeded liabilities. Where liabilities were greater, the amount is shown in the next Table (Table 5 - Liabilities) and the notation (-) is inserted for the year concerned in this table.

Table 5: Consolidated Statement of the Financial Sector - Liabilities Deposits

Deposits of one institution made at another institution are netted out of the latter so as to avoid double-counting; for example deposits of Trust Companies with Commercial Banks are deducted from the total deposits of the Commercial Banks, being counted only in the liabilities of the Trust Companies.

Memo Items

See note to Table C4.

Section E

Interest Rates

Table 1: Commercial Banks - Selected Interest Rates

In this table the range is given for rates quoted by different banks.

Under the provisions of the Interest Rates Act 1970-47, Government could fix maximum rates to be paid on deposits with Commercial Banks. The Rate of Interest Order 1982 amended the Rate of Interest Order 1973, to include Commercial Banks in the list of bodies exempted from the Rate of Interest Act 1970-47.

Since August 1978, the Central Bank has been responsible for fixing certain interest rates applicable to Commercial Banks and other financial institutions.

After the 1982 amendment, the Bank assumed authority for all interest rates. The rates are shown in the table below. The date shown is that at which the regulation became effective.

The notation (..) indicates that no interest rate ceiling or floor was in effect for the category shown in the column heading.

Weighted Average - Selected Loans

In calculating the weighted average loan rate set by the Central Bank, the banks are instructed to exclude certain loan categories. These are consumer instalment credit, foreign currency loans, staff loans, mortgage loans sugar, agriculture and industrial credit fund loans rediscounted with the Central Bank.

Effective October 16, 2001, the Central Bank instructed the banks to also exclude loans on credit cards when calculating their indicative weighted average lending rate on outstanding loans.

Table 2: Comparative Treasury Bill Rates and Bank Rates

Treasury Bill Rates for the U.K., U.S.A. and Canada are the average discount rates on three-month Treasury Bills at the last tender in each month: the rates for Barbados, Guyana, Jamaica and Trinidad and Tobago, are the average rates quoted on the date of issue of three-month bills for the appropriate month. The distinction arises because in the former case there are several tenders per month whereas for CARICOM territories there is usually only one.

Bank rates (minimum lending rate in the case of the U.K.) are those obtained at the end of the month in all cases.

Section F

Securities

Tables 1-3: Government of Barbados Treasury Bills, Debentures and Savings Bonds

All securities are given at nominal value and may vary from those shown in the balance sheets of some institutional holders who report these securities at cost.

Table 1: Government of Barbados Treasury Bills

Effective January, 2005, the annual and quarterly values for the amount applied for and the amount allotted were revised to reflect accumulated values. Also monthly totals are included. The average discount rates now represent the weighted average for the period monthly, quarterly and annual.

Table 2: Government of Barbados Treasury Bills by Institutional Holders

Central Bank

Prior to December 1973, this item represents bills held by the E.C.C.A; as of December 1973, the holdings are those of the Central Bank,

Commercial Banks

The difference between the figures shown here and in section B Table 1 arises because of different bases of valuation.

Data for Barbados Savings Bank included in the Deposit Money Banks.

Section G

Public Finance

Government's financial year runs from April 1 to March 31.

Tables 1- 4: Current revenue and expenditure differ from that published by the Accountant General because of the following adjustments:

(1) *Waterworks & Post Office*

Totals include only the operating surpluses or deficits of these departments, whereas the Accountant General's Report reflects gross venue and expenditure of the Waterworks Department and shows Post Office revenue and expenditure as an annexed item.

(2) Charges of Debt

This item is given net of sinking funds and amortisation payments, which are taken account of in Public Sector Financing,

(3) Loans and Advances

The head 'loans and Advances' in the Accountant General's Report is here excluded from revenue and expenditure and is included in net lending, Totals for the above-mentioned heads are given in memoranda items.

Table 1: Central Administration - Summary of Government Operations

Net Lending

Advances from the Consolidated Fund, net of repayments of such advances, Repayments of loans for the Deep Water Harbour and other loan repayments are included in Net lending.

Table 2: Effective September 2005, the value of Project Loans was revised to reflect the receipt of a loan which was recorded at a later date.

Table 3: Central Administration - Current Revenue

Taxes on Income and Profit -Other

Includes with-holding tax and taxes on insurance premiums.

Levies

Includes Employers levy up to 1988, Training levy, Transport levy, Health levy and Employment levy.

Taxes on Property - Other

Property transfer tax, estate and succession duty and land development duty.

Taxes on Goods and Services - Other

Table 5: Central Administration - Capital Expenditure

Capital Expenditure for 1984/85 differs from that published by the Accountant General. (Deductions of 13.42 million dollars for waterworks stores).

Table 7: Central Administration - National Debt

In this table the National Debt is classified according to the residence of the lender. It is the direct borrowing of the Central Government and does not include guaranteed debt of Government agencies.

Foreign balances have been revised from December 2000.

Domestic – Short-Term

Treasury bills, advances from the Central Bank and Commercial Banks loans and overdrafts with maturities of one year and under, tax certificates and reserve certificates.

Domestic - Long-Term

Government debentures, savings bonds and Commercial Banks long-term loans irrespective of the currency in which the loan is denominated.

Foreign

Comprise capital market issues raised abroad and the disbursed portion of project loans from foreign governments and institutions less repayments.

Table 8: Public Debt Outstanding

Total External Debt

These figures include: the direct debt of Central Government, Central Bank and Government Guaranteed debt, which is non-Central Government debt with Central Government as guarantor, and private sector debt non-guaranteed by Government. This latter category, which was mainly the debt of the Telephone Company and the Electric Company, has been extended effective 2007 to include all institutions in Barbados borrowing from external sources.

Section H

Foreign Trade - International Payments

Table 1: International Reserves

This table has been re-arranged to incorporate sinking funds for foreign debt into foreign assets of the Monetary Authority.

Central Bank

Foreign Assets

The figures to November 1973 represent that portion of the foreign exchange reserves of the East Caribbean Currency Authority which was imputed to Barbados. From December 1973 to June 1975 they consist of the foreign exchange reserves of the Central Bank adjusted for outstanding E.C.C.A. notes and B.C.C.B coins still in circulation in Barbados.

Short Term Liabilities

External borrowing with maturities one year and under.

Central Government

Government Funds

Includes foreign assets of the General Account, the Revenue Equalisation Fund, the Surplus Fund, the General Insurance Fund, the Pension Act Fund, the Nightingale Trust, the Sugar Industry Price Stabilisation Fund, the Harbour Fund, the Watercraft Renewal Fund, and the Public Loans and Supplementary Fund up to November 1974. In December 1974 all these assets, with the exception of the General Account, were transferred to the Central Bank.

Total Sinking Funds (Foreign)

Sums set aside for the redemption of domestic and foreign debt and invested in foreign securities. These reserves are available for balance of payments purposes since the redemption of domestic debt does not require the use of foreign exchange.

Other Foreign Securities

Funds managed by the Central Bank but not included in the CBB foreign assets (ICF and Staff Pension Scheme).

Commercial Banks Net Foreign Assets - See note to Table B3

Other Public Bodies

Foreign assets of the Natural Gas Corporation 1972-1981 and the National Insurance Fund 1972 onwards.

Effective March 2005, Other Public Bodies was changed from 1999.

Table 2: BDS\$ Par/Central Rate For Selected Currencies and the SDR -End of Period

The par rate is the rate at which one currency is fixed in terms of another. The system of par values was abandoned on August 15, 1971, when the official gold convertibility of the U.S. dollar was suspended. The system of floating exchange rates now determined the middle market rates at which official transactions take place.

The par value of the BDS dollar was fixed in sterling at the rate of ,1 to BDS\$4.80 until July 5, 1975, when it was linked to the U.S. dollar at a par value of US\$1 to BDS\$2. Prior to July 5, 1975, the BDS dollar also had a par value in terms of all currencies linked to sterling and after that date a par value in terms of currencies linked to the dollar. After July 5, the UK/BDS\$ rate was calculated from the 1.00 p.m. ,/US\$ New York closing rate.

The US\$/BDS\$ rate from 1952-1973 is the cross rate between the ,/US\$ published in the International Financial Statistics (I.F.S.) and the ,/BDS\$ rate. Rates officially employed by the Central Bank are used in calculations from January 1974 onwards. These are as follows: from January to March 1974 the ,/US\$ 3.00 p.m. London closing rate and from April 1974 to June 1975 the ,/US\$ 1.00 p.m. New York closing rate.

The CAN\$/BDS\$ rate from 1966 -73 is the cross rate between the ,/CAN\$ supplied by the IMF Bureau of Statistics and the ,/BDS\$ rate. From January to March 1974 it was calculated through the ,/CAN\$ 3.00 p.m. London closing rate; and April 1974 to June 1975 through the 1.00 p.m. New York ,/CAN\$ closing rate. After July 1975 the CAN\$/BDS\$ rate was determined by the US\$/Can\$ 1.00 p.m. closing rate from the same source.

Prior to September 8, 1969, the Jamaican currency unit was the Jamaican pound (J) which was equal to the pound sterling or to BDS \$4.80. The J\$ introduced in 1969, was at the rate of J\$1 to J\$2 to J\$1 to BDS\$2.40. This remained unchanged until the end of 1972. On January 16, 1973, the J\$ was fixed in terms of the US\$ at the rate of J\$1 to' US\$1.1 0 and the J\$/BDS\$ rate was determined through the ,/J\$ rate supplied by the Bank of Jamaica until the BDS\$ was also fixed to the US\$ in 1975.

On April 22, 1977, Jamaica adopted a dual exchange rate system. There was a "basic" rate of J\$/BDS\$2.20 and a "special" rate which is the one quoted in tables H2 and H3, of J\$/BDS\$1.60. The "basic" rate was applied to:-

- (a) payments for imports of basic foods, petroleum and petroleum products, essential drugs. Fertilizers and animal feeds;
- (b) receipts and payments on Government account; and,
- (c) receipts and payments relating to the mining sector.

All other transactions were at the special rate.

On October 21, 1977, a new special rate of J\$/BDS\$1.5625 became effective.

Effective January 13, 1978, Jamaica adopted new "basic" and "special" rates. The new basic rate was J\$/BDS\$1.9048 and the new special rate was J\$/BDS\$1.4815.

With effect from May 9, 1978, Jamaica abolished the dual exchange rate system and announced a new central rate of J\$/BDS\$1.2903. At that time, it was also announced that the agreement with the IMF on the use of resources from the Extended Fund Facility included monthly revaluations of the Jamaican dollar. These series of devaluations terminated in May 1979.

On January 10, 1983, the Bank of Jamaica introduced a dual exchange rate system. The official rate of exchange remained at J\$1. 78 = US\$1.00 and a formal parallel market was established. The parallel market rates were determined by commercial banks on the basis of demand and supply.

In addition to this rate, a special CARICOM rate of J\$2.25 = US\$1.00 was introduced on May 18, 1983. On November 24, 1983 the Government of Jamaica unified the exchange rate system, authorising the Bank of Jamaica to advise the official U.S. dollar value of the Jamaican currency on a fortnightly basis.

For the first fortnight, November 24 to December 14, 1983 the settlement rate was BDS\$1.00 to J\$1.5625.

As of May 1984, Jamaica's exchange rate was determined by auction. Twice every week the Bank of Jamaica entertained bids for the available foreign exchange from commercial banks and the public. The rate was fixed at the average of all the bids, until the next auction.

Effective October 25, 1989 the auction took place once a week. As of November 1, 1989, the auction mechanism was suspended.

With the introduction of the new interbank foreign exchange system on September 17, 1990, each commercial bank sets its own exchange rate. For official purposes, the rate is calculated as the weighted average of commercial banks selling rates.

The TT\$ and the EC\$ were equal in value to the BDS\$ until the latter was tied to the US\$. After July 5, the BDS\$/TT\$, the BDS\$/EC\$ rates were determined by the BDS\$/US\$ rate as calculated above. On May 28, 1976, the TT\$ was tied to the US\$ at the rate of US\$1.00 to TT\$2.40. On July 7, 1976, the EC\$ was tied to the US\$ at the rate of US\$1.00 to EC\$2.70.

On December 18, 1985 the rate at which the TT\$ was tied to the US\$ was changed to US\$1.00 to TT\$3.60. On August 17, 1988 the rate at which the TT\$ was tied to the US\$ was changed to US\$1.00 to TT\$4.25.

The G\$ was equal in value to the BDS\$ until December 22, 1971, when the former was devalued. Thereafter, it remained fixed to the pound sterling until October 9, 1975, when it was linked to the US\$ at the rate of US\$1 to G\$2.55. Between July 5 and October 9, the BDS\$/G\$ rate was calculated on the same basis as the TT\$/BDS\$ rate. It was announced that from June 2, 1981, the G\$ exchange was to be determined by movements in the rates of selected currencies which comprised a composite basket. The initial currencies selected for the basket were US\$, Stg, OM, TT\$ and the Japanese Yen. The G\$ exchange rate was fixed at US\$1.00 to G\$3.00. The US\$ continued to be Guyana's intervention currency. From January 11, 1984, the composite basket of currencies used to determine the Guyana dollar (G\$) was changed to Stg., OM, French franc, Netherlands guilder and the Japanese yen. Initially the Guyana dollar exchange rate was fixed at US\$1.00 to G\$3.75.

Although the Guyana Dollar is pegged to a basket of currencies, it has been adjusted, from time to time, to maintain a certain level vis-a-vis the U.S. dollar. From October 1984 until January 1987, the rate was maintained in the range of G\$4.15 to G\$4.40 per U.S. dollar.

Effective January 19, 1987, the Guyana dollar was devalued to G\$1 0.00 per US\$1.00. On February 1, 1987 a secondary foreign exchange window was opened at commercial banks operation at G\$21 per US\$1.00 for non-official transactions. Effective April 3, 1989, the Guyana dollar was devalued moving the central rate to G\$33.00 to US\$1.00. All other rates were abolished. As of June 15, 1990, the rate for the Guyana dollar was fixed at US\$1.00 = G\$60.00. Effective June 25, 1990 the rate was changed to US\$1.00 = G\$65.00, then on July 30, 1990, to US\$1.00 = G\$70.00, August 27, 1990, to US\$1.00 = G\$75.00, September 3, 1990, to US\$1.00 = G\$81.50, September 10, 1990, to US\$1.00 = G\$83.50, October 1, 1990, to US\$1.00 = G\$87.00, October 15, 1990, to US\$1.00 = G\$89.00, October 29, 1990, to US\$1.00 = G\$98.00, November 26, 1990, to US\$1.00 = G\$91.00 and December 3, 1990, to US\$1.00 = G\$98.00.

With effect from February 21, 1991, a floating rate was adopted. Up to September 30, 1991, the rate was calculated weekly based on a weighted average of the free market rate of the previous week covering the transactions of the top ten licensed dealers. Since October 1, 1991, the calculation is on a daily basis. However the coverage has been revised to include a weighted average of the transactions of the three largest dealers.

The Free market rate (Cambio), which was introduced on March 17, 1990, replaced the Parallel Market rate. The free market buying (selling) rate is derived as an unweighted daily average purchase (sales) rate of all licensed foreign exchange dealers for the month. The mid-rate is derived as a simple arithmetic mean of the free market buying and selling rates.

The SDR/BDS\$ rate is the cross rate between the SDR/US\$ rate and the US\$/BDS\$. Prior to December 1971, the SDR was valued at the par value of the U.S. dollar, i.e., 1 SDR = US\$1.

Table 3: BDS\$ Exchange Rate for Selected Currencies and the SDR-Average for Period.

The monthly exchange rate is the average of the daily rates for the period. The quarterly rates are the averages for three months and the annual rate is an average for the twelve-month period January to December.

Table 4: Visible Trade

Trade data for twelve-month period does not necessarily add up to annual data, because of changes and corrections which are made quarterly and annually.

Total exports for 1983 does not agree with data from Barbados Statistical Service because of evaluation adjustments.

Table 6: Retained Imports By Broad Economic Categories

Retained imports are negative when re-exports exceed imports. This occurs especially for fuels since bunker and aviation fuel are usually imported once every three months and stored for re-export.

Capital Goods

Up to 1978, machinery included electrical components. From 1979 a separate head for electrical components appears under "Intermediate Goods". From 1982 dental and optical appliances and photographic equipment appear under "Capital Goods". All items under construction materials, except heating and plumbing materials, have been transferred to "Intermediate Goods".

Table 9: Tourist/Visitor Statistics By Country of Residence

The CARICOM countries are: Anguilla, Antigua, Bahamas Belize, Dominica, Grenada, Guyana, Jamaica, Montserrat, St. Lucia, St. Kitts-Nevis, St. Vincent and Trinidad and Tobago. (Barbados is also a member of CARICOM).

Table 10: Tourist/Visitor Statistics By Length of Stay

The intended length of stay is obtained from the Entry/Departure (E/D) card filed with the Immigration Department on arrival, and may differ from actual length of stay. The monthly data on intended length of stay for 1973 is only available for the period 1-7 days and over 7 days.

$$\begin{aligned} \text{Average length of stay} &= \frac{\text{No. of bednights}}{\text{New registrations}} \\ \text{Hotel bed occupancy rate} &= \frac{\text{No. of bednights}}{\text{No. of beds available}} \times 100 \\ \text{Hotel room occupancy rate} &= \frac{\text{No. of rooms occupied}}{\text{No. of rooms available}} \times 100 \end{aligned}$$

General Statistics

Table 1: Retail Price Index – End of Period

The Retail Prices Index is prepared by the Barbados Statistical Service. It is designed to measure price changes in the typical basket of goods and services purchased by a household.

A new Index of Retail Prices with base of March 1980 replaced the old index, which was based on October 1965. October 1979 was the first month from which data was available for both indexes; and data prior to October 1979 was obtained by multiplying All Items of the old index by the ratio 0.2126, i.e.,

$$\frac{\text{October 1979 (New Index)}}{\text{October 1979 (Old Index)}}$$

Effective July 1995, the B.S.S. ceased production of the 1980 base year Retail Index. This has been replaced by a new index with a 1994 base year. May 1994 was the first month from which data was available for both indexes; and data prior to May 1994 was obtained by multiplying All Items of the old index by the ratio 0.4898, i.e.,

$$\frac{\text{May 1994 (New Index)}}{\text{May 1994 (Old Index)}}$$

The new index is representative of the consumption patterns of private households with disposable income of \$3,500 or less per month compared with \$1,999 for the old index. 226 items of goods and services are covered in the new index as against 168 items previously.

A new index of Retail Prices with base of July 2001 replaced the old index, which was based on May 1994. July 2001 was the first month the data was available in both indexes, and data prior to July 2001 may be obtained by multiplying all Items of the old index by the ratio .8824, ie,:

July 2001 (New Index)
July 2001 (Old Index)

The current series covers the whole range of commodities and service that are consumed by private non-institutional households in the island, in the lower and middle-income groups. The items in the index remained the same but the sample of goods and services consists of 340 items as compared with 226 items in the previous index.

The Inflation Rate is calculated on the twelve month moving average.

Table 2: Retail Price Index - Averages For Period

The annual Retail Price Index is an average for the twelve-month period January to December. The quarterly figures are the averages for three months.

The Retail Price Index was revised from July 2001 with a new base period of July 2001 =100, instead of May 1994 = 100.

Table 3: Index of Industrial Production - End for Period

Other Manufacturing Industries

Includes other non-metallic products, printing group, fabricated metal products, electrical machinery and transport equipment.

The annual index is an average for the twelve-month period January to December.

Data for Mining & Quarrying and Beverages & Tobacco has been revised from 1990.

Table 4: Index of Industrial Production - Averages for the Period

Data for Mining & Quarrying and Beverages & Tobacco has been revised from 1990.

Table 5: Labour Force and Employment by Sex

Adult Population

Population 15 years of age and over.

Total Labour Force

All persons 15 years old and over who are gainfully employed or were seeking employment in the three-month period prior to enumeration.

Unemployment Rate

Unemployment as percent of Labour Force.

Participation Rate

Labour Force as a percentage of Total Adult population.

The annual data is the average of the four quarters.
